

BEATING THE PRODUCTIVITY CHALLENGE

SHARING IN GROWTH

- Award-winning business transformation programme
- Delivering world-class competitiveness and productivity
- Implementing the UK Industrial Strategy
- Government and industry exemplar partnership

Investing in Productivity and Growth

Productivity remains the economic challenge of our time. Growth, jobs and wealth creation all depend on productivity. Yet, although the UK needs to compete globally, now more than ever, the country has struggled to improve.

Sharing in Growth are business transformation experts in the complex world of advanced manufacturing. With 2,000 years' industrial experience, our team applies global best practice, enabling UK aerospace suppliers to create sustainable growth.

We were formed in 2012 because UK aerospace was losing market share to more competitive countries. Now we are helping ambitious companies to secure contracts and jobs, typically by addressing gaps of 50% in productivity and 20% in cost. We are effective because Sharing in Growth has the scale and intensity commensurate with the challenge. Companies on the Sharing in Growth programme win business and so are able to invest further in their people, plant and technology which in turn helps them become even more competitive.

“The degree of change we have undergone in four years with Sharing in Growth is unprecedented in our 126 year history and has played a big part in transforming our company into a globally competitive organisation securing 200 employees.”

Steve Kirk,
Managing Director

“Sharing in Growth is an excellent example of the government and engineering working together to make our industry more effective, more efficient and future-proofed. This is increasing opportunity, sales and jobs.”

Andrew Churchill,
Executive Chairman

Developing highly valued manufacturing for this generation and the next

We analyse a business from top to bottom and then tailor our support to each company's required strategy, focussing on leadership and operational skills, linked to culture. Our 100 industry experts help ambitious companies to set clear direction, engage the workforce and embed skills so they can achieve their growth aspirations. Our approach can be applied to any high value manufacturing sector. The programme aligns strongly with the Government's Industrial Strategy, which needs an equal investment in people, alongside technology and infrastructure.

In 2018 Sharing in Growth won the national Sema Innovation Award for improving the capability and productivity of over 10,000 people working in the aerospace supply chain.

Driving the productivity of UK aerospace to compete globally, securing 10,000 jobs by 2020

SHARING IN GROWTH

- Endorsed by Airbus, BAE Systems, Boeing, Bombardier, GE, GKN, Leonardo, Lockheed Martin, MBDA, Rolls-Royce, Safran and Thales.
- Over £4 billion in contracts secured, forecast to reach £8 billion.
- More than 7,000 UK jobs safeguarded and on target to hit 10,000.
- 3 million training hours delivered to 63 companies.
- Raising the skills of 10,000 employees and delivering national recognised qualifications.
- Targeting 50% average productivity increase.
- More than £150 million in private investment.
- Participants have committed to invest £300 million in new capital equipment.
- Potential to reduce credit risk for banks or other investors.
- Helping companies grow by five times the industry average.
- Every £1 of government investment in Sharing in Growth creates £60 of GVA.

Developing great people, making great businesses

Castle Precision Engineering
Record £80m order

Produmax
Sales and jobs up >50% plus two new factories

Hyde Aero Products
50% productivity increase plus 60 jobs

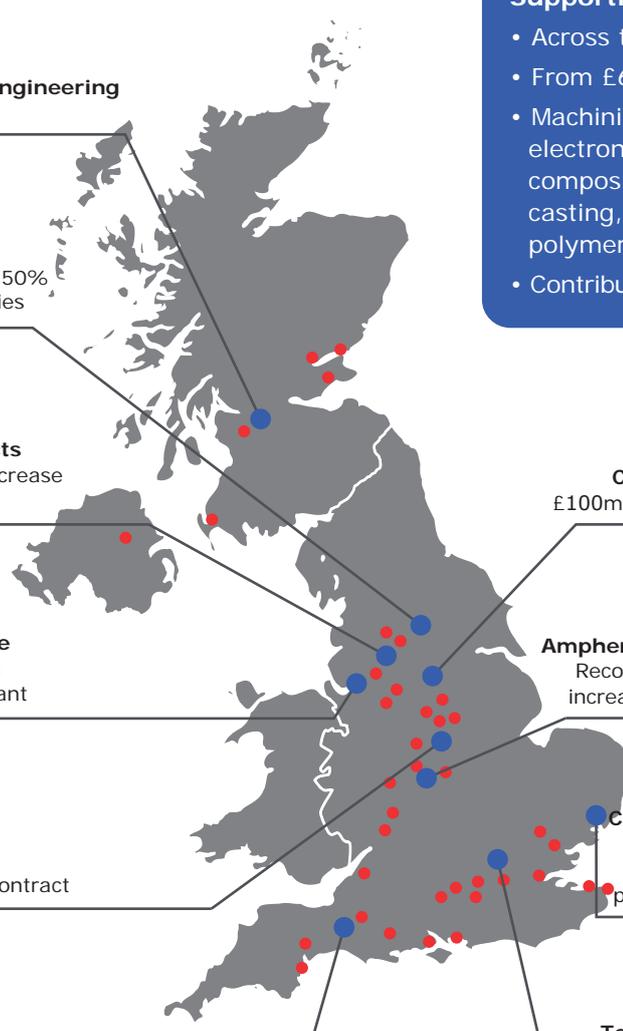

Carpenter Additive
£17m investment in additives powder plant

JJ Churchill Ltd
£70m Rolls-Royce contract

G&H Ilminster
75% sales growth plus 100 jobs

Supporting companies:

- Across the UK
- From £6 million to £70 million turnover
- Machining, fabrication, assembly, electronics, electrical, protonics, composites, special processing, casting, additive manufacturing, polymers, repair and overhaul
- Contributing to other higher value sectors

CW Fletcher
£100m in contracts

Amphenol Invotec
Record sales and increased exports

Rockford Components
60% sales increase plus 100 jobs

TMD Technologies
64% gain in productivity
