

- An award-winning business transformation company
- Delivering world-class competitiveness and productivity to UK manufacturing
- Government and industry exemplar partnership

Investing in Productivity and Growth

Productivity remains the economic challenge of our time. Growth, jobs and wealth creation are all dependent on productivity. Yet, although the UK needs to compete globally, now more than ever, the country is struggling to improve.

Sharing in Growth are business transformation experts in the complex world of advanced manufacturing. With over 2,000 years' industrial experience, our team applies global best practice, enabling UK companies to create sustainable growth.

Sharing in Growth was founded in 2012 with its goal to drive the productivity of UK aerospace suppliers in order to compete globally. We are helping ambitious companies to secure contracts and jobs, typically by addressing gaps of 50% in productivity and 20% in product cost. We are effective because Sharing in Growth has the scale and intensity commensurate with the challenge. Sharing in Growth has engaged with over 70 UK companies that directly supply into Aerospace, Renewables, Defence, Automotive, Oil & Gas and Medical sectors.

“The degree of change we have undergone in four years with Sharing in Growth is unprecedented in our 126-year history and has played a big part in transforming our company into a globally competitive organisation securing work for 200 employees.”

**Steve Kirk,
Managing Director**

“Sharing in Growth is an excellent example of the government and engineering working together to make our industry more effective, more efficient and future-proofed. This is increasing opportunity, sales and jobs.”

**Andrew Churchill
Executive Chairman**

Developing highly valued manufacturing for this generation and the next.....

We analyse a business from top to bottom and then tailor our intervention to each company's required strategy, delivering a holistic business transformation. Our team of 100 industry experts work with ambitious companies to deliver 'Insight & Intervention', working alongside them to create a compelling vision and emotional connection for the people, in order for them to achieve their growth aspirations.

Business growth, capital investment and net worth from companies engaged with Sharing in Growth have shown strong positive trends beyond their peers in the wider supply chain.

In recent years Sharing in Growth has been independently recognised by winning the SEMTA Skills Award for 'Innovation' (2018), and a Princess Royal Training Award for 'Impact & Excellence' (2020).
